

HTML Form Handling

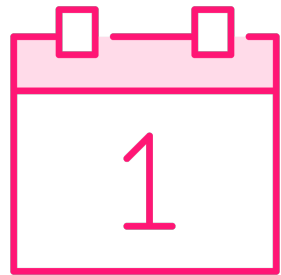

Christian Wenz

Consultant, Software Architect

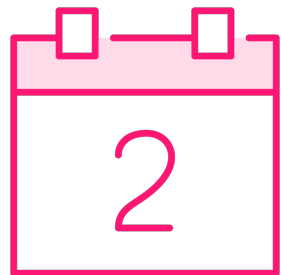

@chwenz

Accessing HTML Form Elements

DOM selection methods

`document.forms[0].elements[2]`

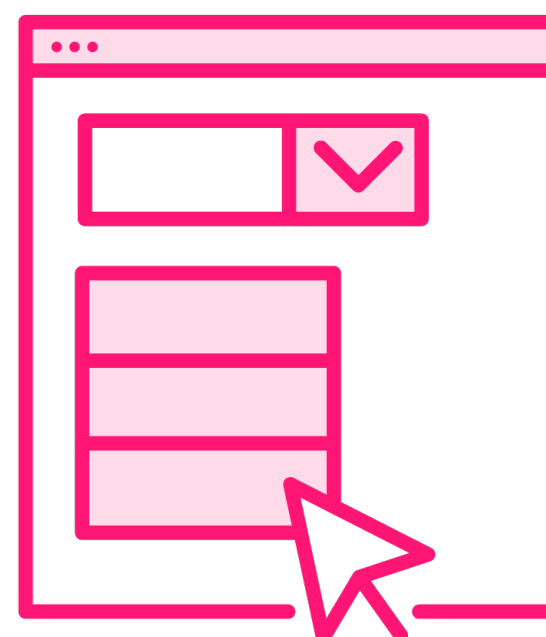

`document.forms["my-form"].elements["my-element"]`

Accessing HTML Form Element Values

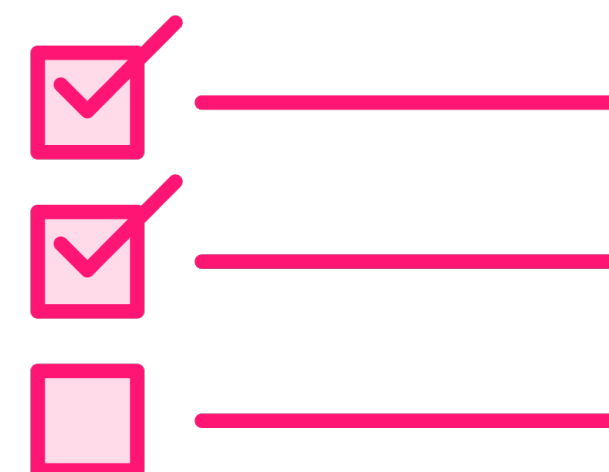

value

options

selectedIndex

value

checked

value

```
<form onsubmit="return false">
```

```
<form onsubmit="return checkForm(this)">
```

```
form.onsubmit = (e) => {  
    // ...  
    e.preventDefault();  
}
```

◀ **Prevent form submission**

◀ **Prevent form submission if validation fails**

◀ **Prevent form submission in handler function**
